

Health Diagnosis Assistant

Welcome to the Health Diagnosis Assistant!

Our system provides quick remedies and over-the-counter medications for minor symptoms. If needed, you can also consult a doctor through a video or audio call.

Check Your Symptoms

- OTC Medicine: Paracetamol (500mg) every 6-8 hours.
Note: If fever persists for more than 2 days or exceeds 102°F, consult a doctor.

For cough:
- Home Remedy: Drink warm water with honey and ginger.
- OTC Medicine: Cough syrup such as Benadryl.
Note: If cough lasts longer than a week, consult a doctor.
